

16 July 2006

"I have a dream" somebody said.

My dream (vision) for our children, especially the poor, includes

1. leading them to ...
 - enjoy Mathematics as a school subject
 - use the mathematical systematic thought processes for decision making
 - pursue a career in mathematics related fields
 - unselfishly function in the community as leaders (leadership governed by principles)
 - creatively apply the perceptions of mathematics to enhance their lives
2. inspiring, motivating and unleashing their potential vision
3. to develop and build their confidence in their own ability to work through and solve real life problems
4. to build their confidence and self esteem so that they can take pride in whom they are.

Its with deep gratitude that I express my, and I know I can speak on behalf of all the children too, appreciation to you for

- making it happen
- opening your heart to play a vital part in the education of our children
- sharing the vision (and even taken it further)
- inspiration, encouragement and motivation (Its so easy to give up like so many others)
- your precious insight ,passion and devotion
- all your contribution

We thank you Frank, for FLKS

Martin and Margot,

all the other role players

and God, the Father of us all who provides for us all.

Michael Dragner

and the FLKS children of Knysna
